# Subject Index

— A —

*Acanthocheilonema viteae* infection in multimammate rats: (*Mastomys natalensis*) immune response to (Chandrashekar, Rao and Subrahmanyam) 21

Actinomycin D and prostaglandin $E_2$: effect on plasma leakage induced by neutrophil-activating peptide-1/interleukin-8 (Colditz) 397

Adenocarcinoma-producing cachexia, rat mammary: biochemical manifestations of (Coyle, Rofe, Bourgeois and Conyers) 147

Adjuvant-induced inflammation: prevention of adjuvant-induced cachexia in rats by cyclosporin A (Rofe, Whitehouse, Bourgeois, Haynes and Vernon-Roberts) 63

Adjuvants and antigens: influence on production of gamma-interferon and antibody by ovine lymphocytes (Emery, Rothel and Wood) 127

Adjuvants for hepatitis B vaccines: humoral immune responses in mice using gamma inulin preparations (Leslie, Nicholson, Dimitrakakis, Johnston and Gust) 107

Anti-asialo-$GM_1$ inhibits vaccinia virus infection of murine ovaries: asialo-$GM_1$ as an additional virus receptor? (Brief Comm.) (Karupiah and Blanden) 343

Antibodies to type II collagen in SLE: role in pathogenesis of deforming arthritis (Choi, Gatenby, Bateman and Cole) 27

Antibody against *Bacillus thuringiensis* phosphatidylinositol-phospholipase C: potential uses of (Théveniau, Malapert and Rougon) 87

Antibody and gamma-interferon production by ovine lymphocytes: influence of antigens and adjuvants (Emery, Rothel and Wood) 127

Antibody RCC-1: characteristics of a breast cancer-associated antigen defined by (Tjandra, Zalcberg, Xing and McKenzie) 191

Antigen presentation by peritoneal cells of normal and *Salmonella*-infected mice (Vordermeier, Pope and Kotlarski) 161

Antigen, breast cancer-associated: characteristics of (Tjandra, Zalcberg, Xing and McKenzie) 191

Antigen, carcino-embryonic: production of MoAbs to (Teh and McKenzie) 263

Antigen, immunodominant, from *Candida albicans*: homologous to the enzyme enolase (Franklyn, Warmington, Ott and Ashman) 173

Antigen-specific cytolytic T cells: requirements for stimulation and target cell recognition by immune and non-immune cytotoxic (Owen, Grahl, Zador, Dorer, Klein and Rubin) 269

Antigens and adjuvants: influence on production of gamma-interferon and antibody by ovine lymphocytes (Emery, Rothel and Wood) 127

Antigens and immune responses in *Candida albicans* infection (Review) (Ashman, Papadimitriou, Ott and Warmington) 1

Antigens which stimulate T cells of *Salmonella enteritidis* 11RX immunized mice (Vordermeier and Kotlarski) 299

Antigens, low molecular weight: partial purification and characterization of in *Salmonella enteritidis* 11RX-primed T cells (Vordermeier and Kotlarski) 307

Arthritis of SLE: role of antibodies to type II collagen in pathogenesis of (Choi, Gatenby, Bateman and Cole) 27

Asialo-$GM_1$ as an additional virus receptor for vaccinia virus infection of murine ovaries? (Brief Comm.) (Karupiah and Blanden) 343

Autoimmunity to type II collagen in SLE: role in pathogenesis of deforming arthritis (Choi, Gatenby, Bateman and Cole) 27

Autoreactivity, T cell-mediated, strain-specific: murine candidiasis susceptibility associated with (Ashman) 179

— B —

B cell and T cell epitopes of the *Mycobacterium bovis* protein, MPB70: mapping of (Billman-Jacobe, Radford, Rothel and Wood) 359

B cell and T cell mitogens: effect of glutamine on murine splenic leukocyte responses to (Brief Comm.) (Griffiths and Keast) 349

*Bacillus thuringiensis* phosphatidylinositol-phospholipase C: potential uses of anti-

body against (Théveniau, Malapert and Rougon) 87
Binding site of dextran sulfate on CD2: mapping of (Warren and Parish) 199
Breast cancer-associated antigen defined by RCC-1 antibody (Tjandra, Zalcberg, Xing and McKenzie) 191
Buccal cells: inhibition of adhesion by respiratory secretions (Taylor, Cripps and Clancy) 335

— C —

Cachexia from rat mammary adenocarcinoma: biochemical manifestations of (Coyle, Rofe, Bourgeois and Conyers) 147
Cachexia, adjuvant-induced: prevention in rats by cyclosporin A (Rofe, Whitehouse, Bourgeois, Haynes and Vernon-Roberts) 63
*Candida albicans*: an immunodominant antigen homologous to the enzyme enolase (Franklyn, Warmington, Ott and Ashman) 173
*Candida albicans*: homology of an immunodominant antigen of with enzyme enolase (Corrigendum) (Franklyn, Warmington, Ott and Ashman) 347
*Candida albicans* infection: antigens and immune responses in (Review) (Ashman, Papadimitriou, Ott and Warmington) 1
*Candida albicans* infection in mice: cell-mediated immune responses correlate directly with susceptibility and resistance to infection (Ashman) 15
Candidiasis susceptibility, murine: associated with induction of T cell-mediated, strain-specific autoreactivity (Ashman) 179
Carcino-embryonic antigens: production of MoAbs to (Teh and McKenzie) 263
Cell-mediated immune responses to murine candidiasis: direct correlation with susceptibility and resistance (Ashman) 15
Clonal analysis of effect of iron on human cytotoxic and proliferating T cells (Rudd, Good, Chapman, Powell and Halliday) 317
Cloned glutathione-S-transferases plus crude schistosome antigens: resistance in mice to *Schistosoma japonicum* and *Schistosoma mansoni* induced by exposure to (Mitchell, Davern, Wood, Wright, Argyropoulos, McLeod, Tiu and Garcia) 377
Coeliac disease: lymphocyte activation in (Penttila, Gibson, Forrest, Cummins and LaBrooy) 155
Collagen, type II, in SLE: role of antibodies to in pathogenesis of (Choi, Gatenby, Bateman and Cole) 27
Colorectal cancer: MoAbs reactive with human milk fat globular membranes (Teh, Xing and McKenzie) 207
Colorectal carcinoma: production and characterization of a new MoAb to (Teh, Thompson and McKenzie) 253
Crude schistosome antigens plus cloned glutathione-S-transferases: resistance in mice to *Schistosoma japonicum* and *Schistosoma mansoni* induced by exposure to (Mitchell, Davern, Wood, Wright, Argyropoulos, McLeod, Tiu and Garcia) 377
Culture technique: *in vitro* culture of disaggregated rabbit keratinocytes (Briedahl, Judson, Dumble and Clunie) 119
Cyclo-oxygenase inhibitor, Piroxicam: enhances cytokine-induced lymphocyte proliferation (Haynes, Wright, Whitehouse and Vernon-Roberts) 225
Cyclosporin A to prevent adjuvant-induced cachexia in rats (Rofe, Whitehouse, Bourgeois, Haynes and Vernon-Roberts) 63
Cytokine-induced lymphocyte proliferation: enhanced by the cyclo-oxygenase inhibitor, Piroxicam (Haynes, Wright, Whitehouse and Vernon-Roberts) 225
Cytomegalovirus infection, murine: depression of humoral responses by (Price) 33

— D —

Dextran sulfate binding site on CD2: mapping of (Warren and Parish) 199
Dodecylglycerol treatment of mouse lymphocytes *in vitro*: a serum factor for macrophage activation after (Homma, Millman and Yamamoto) 137
Dual mechanisms of inhibition of the immune response by enterocytes isolated from the rat small intestine (Pang, Clancy and Saunders) 387
Duchenne muscular dystrophy: myoblast transfer therapy techniques, implications for (Bao, King, dos Remedios) 235

— E —

Ecto-5′-nucleotidase activity measurement: a semi-automated method (Chalmers and Hare) 75
Ectoenzyme activity in HIV-infected patients (Chalmers, Hare, Woolley and Frazer) 81

Ectoenzyme activity measurement: a semi-automated method (Chalmers and Hare) 75
ELISA for tumour necrosis factor: improved sensitivity (McLaughlin, Elwood, Ramadi, Pica and McKenzie) 51
Enolase enzyme shows homology with an immunodominant antigen of *Candida albicans* (Corrigendum) (Franklyn, Warmington, Ott and Ashman) 347
Enolase enzyme: homologous to an immunodominant antigen from *Candida albicans* (Franklyn, Warmington, Ott and Ashman) 173
Enterocytes isolated from the rat small intestine: dual mechanisms of inhibition of the immune response by (Pang, Clancy and Saunders) 387
Enzyme, *Bacillus thuringiensis* phosphatidylinositol-phospholipase C: potential uses of antibody against (Théveniau, Malapert and Rougon) 87
Enzyme-linked immunosorbent assay for tumour necrosis factor: improved sensitivity (McLaughlin, Elwood, Ramadi, Pica and McKenzie) 51
Epithelial cell detachment and damage: effects of proteases and oxidants (Mendis, Venaille and Robinson) 95
Epitopes of T and B cells: mapping of in the *Mycobacterium bovis* protein, MPB70 (Billman-Jacobe, Radford, Rothel and Wood) 359

— G —

Gamma inulin preparations as adjuvants for hepatitis B vaccines: humoral immune responses in mice (Leslie, Nicholson, Dimitrakakis, Johnston and Gust) 107
Gamma-interferon and antibody production by ovine lymphocytes: influence of antigens and adjuvants (Emery, Rothel and Wood) 127
Gamma-interferon stimulation: elevated MHC class I and II antigens in cultured human embryonic myoblasts after (Bao, King, dos Remedios) 235
Genital warts: molecular biology and immunology (Meeting Report) (Tindle) 71
Glutamine: effect on murine splenic leukocyte responses to T and B cell mitogens (Brief Comm.) (Griffiths and Keast) 349
Granulocyte-colony stimulating factor, recombinant: *in vivo* effects in athymic nude mice (Pojda, Aoki and Tsuboi) 231

— H —

*Haemophilus influenzae*: inhibition of adhesion to buccal cells by respiratory secretions (Taylor, Cripps and Clancy) 335
Haemorrhagic septicaemia in cattle and buffalo: *Pasteurella multocida* infections in mice with reference to (Ramdani, Dawkins, Johnson, Spencer and Adler) 57
HAMA response in patients: development of (Tjandra, Ramadi and McKenzie) 367
Hepatitis B vaccines: humoral immune responses in mice using gamma inulin preparations as adjuvants for (Leslie, Nicholson, Dimitrakakis, Johnston and Gust) 107
HIV-infected patients: ectoenzyme activity in (Chalmers, Hare, Woolley and Frazer) 81
Human anti-murine antibody response in patients: development of (Tjandra, Ramadi and McKenzie) 367
Human epithelial cell detachment and damage: effects of proteases and oxidants (Mendis, Venaille and Robinson) 95
Human immunodeficiency virus gp160 and human IL-2: response of monkeys to recombinant vaccinia virus which coexpress (Ruby, Brinkman, Jones and Ramshaw) 113
Human papillomavirus, genital infection: molecular biology and immunology of (Meeting Report) (Tindle) 71
Humoral immune response of monkeys to recombinant vaccinia virus which coexpress HIV gp160 and human IL-2 (Ruby, Brinkman, Jones and Ramshaw) 113
Humoral immune responses and murine cytomegalovirus infection (Price) 33
Humoral immune responses in mice using gamma inulin preparations as adjuvants for hepatitis B vaccines (Leslie, Nicholson, Dimitrakakis, Johnston and Gust) 107

— I —

Immune response by enterocytes isolated from the rat small intestine: dual mechanisms of inhibition of (Pang, Clancy and Saunders) 387
Immune response, humoral: in mice using gamma inulin preparations as adjuvants for hepatitis B vaccines (Leslie, Nicholson, Dimitrakakis, Johnston and Gust) 107
Immune response, humoral: in monkeys to recombinant vaccinia virus which co-

express HIV gp160 and human IL-2 (Ruby, Brinkman, Jones and Ramshaw) 113
Immune responses and antigens in *Candida albicans* infection (Review) (Ashman, Papadimitriou, Ott and Warmington) 1
Immunized mice: identification of antigens which stimulate T cells of *Salmonella enteritidis* 11RX immunized mice (Vordermeier and Kotlarski) 299
Immunoflorescence: to detect expression of p70 chain of the IL-2 receptor on human lymphoid cells (Zola, Purling, Koh and Tsudo) 217
Immunology of genital warts (Meeting Report) (Tindle) 71
Immunosuppression of humoral response by cytomegalovirus infection (Price) 33
Interleukin-2 receptor expression to gluten fraction 111 in coeliac disease (Penttila, Gibson, Forrest, Cummins and LaBrooy) 155
Interleukin-2 receptor on cord blood and nulliparous MNC: downregulated by maternal and cord blood serum (Vanderbeeken, Duchateau, Van Boogaert, Desseilles, Collet and Lucas) 243
Interleukin-2 receptor on human lymphoid cells: expression of the p70 chain (Zola, Purling, Koh and Tsudo) 217
Interleukin-2, virus-expressed: vaccinia virus-mediated damage of murine ovaries and protection by (Karupiah, Coupar, Ramshaw, Boyle, Blanden and Andrew) 325
Interleukin-2: response of monkeys to recombinant vaccinia virus which coexpress HIV gp160 and (Ruby, Brinkman, Jones and Ramshaw) 113
Interleukin-8/neutrophil-activating peptide-1 induced plasma leakage: effect of exogenous prostaglandin $E_2$ and actinomycin D (Colditz) 397
Iron: clonal analysis of effect on human cytotoxic and proliferating T cells (Rudd, Good, Chapman, Powell and Halliday) 317

— K —

Keratinocytes, rabbit: culture of *in vitro* (Briedahl, Judson, Dumble and Clunie) 119

— L —

Leukocyte responses to T and B cell mitogens, murine splenic: effect of glutamine on (Brief Comm.) (Griffiths and Keast) 349
*Listeria monocytogenes* in murine infection: distinction between 'inflammatory' and 'immune' macrophages which kill (Tran, Cook, Ganas and Cheers) 289
Livestock diseases: *Pasteurella multocida* infections in mice with reference to haemorrhagic septicaemia in cattle and buffalo (Ramdani, Dawkins, Johnson, Spencer and Adler) 57
Lymphocyte 5'-ectonucleotidase activity measurement: a semi-automated method (Chalmers and Hare) 75
Lymphocyte activation in coeliac disease (Penttila, Gibson, Forrest, Cummins and LaBrooy) 155
Lymphocyte ectoenzyme activity in HIV-infected patients (Chalmers, Hare, Woolley and Frazer) 81
Lymphocyte proliferation, cytokine-induced: cyclo-oxygenase (Piroxicam) enhances (Haynes, Wright, Whitehouse and Vernon-Roberts) 225
Lymphocyte subpopulations in sheep with lymphosarcoma from bovine leukaemia virus (Dimmock, Ward and Trueman) 45
Lymphocyte subpopulations, T cells: quantitative estimation during acute and chronic *Plasmodium berghei* infection (Wangoo, Kaur, Ganguly, Bhatti and Mahajan) 187
Lymphocytes, mouse: a serum factor for macrophage activation after *in vitro* dodecylglycerol treatment of (Homma, Millman and Yamamoto) 137
Lymphocytes, ovine: influence of antigens and adjuvants on production of gamma-interferon and antibody by (Emery, Rothel and Wood) 127
Lymphocytes, unstimulated: demonstration of IL-2R chains by immunoflorescence (Zola, Purling, Koh and Tsudo) 217
Lymphosarcoma in sheep from bovine leukaemia virus infection: lymphocyte subpopulations in (Dimmock, Ward and Trueman) 45

— M —

Macrophage activation after *in vitro* dodecylglycerol treatment of mouse lymphocytes: a serum factor for (Homma, Millman and Yamamoto) 137
Macrophages killing *Listeria monocytogenes* in murine infection: distinction between

'inflammatory' and 'immune' populations (Tran, Cook, Ganas and Cheers) 289
Major histocompatibility complex class I and II antigens in cultured human embryonic myoblasts following stimulation with gamma-interferon (Bao, King, dos Remedios) 235
Malaria: quantitative estimation of T cells during *Plasmodium berghei* infection (Wangoo, Kaur, Ganguly, Bhatti and Mahajan) 187
Mapping of T and B cell epitopes of the *Mycobacterium bovis* protein, MPB70 (Billman-Jacobe, Radford, Rothel and Wood) 359
*Mastomys natalensis*: immune response to *Acanthocheilonema viteae* infection in (Chandrashekar, Rao and Subrahmanyam) 21
Maternal and cord blood serum downregulates IL-2 receptor on cord blood and nulliparous MNC (Vanderbeeken, Duchateau, Van Boogaert, Desseilles, Collet and Lucas) 243
Membranes and protein binding: potential uses of antibody against *Bacillus thuringiensis* phosphatidylinositol-phospholipase C (Théveniau, Malapert and Rougon) 87
Method for measuring lymphocyte 5'-ectonucleotidase activity (Chalmers and Hare) 75
Microfilariae: immune response of multimammate rats (*Mastomys natalensis*) to *Acanthocheilonema viteae* infection (Chandrashekar, Rao and Subrahmanyam) 21
Mitogens, T and B cell: effect of glutamine on murine splenic leukocyte responses to (Brief Comm.) (Griffiths and Keast) 349
Molecular biology of genital warts (Meeting Report) (Tindle) 71
Monoclonal allo-antibody to murine natural cytotoxic cells: production of (Smart, Stevenson, Farrely, Brien and Burton) 277
Monoclonal antibodies to carcino-embryonic antigen: production of (Teh and McKenzie) 263
Monoclonal antibodies, anti-colorectal carcinoma: reactive with human milk fat globular membranes (Teh, Xing and McKenzie) 207
Monoclonal antibodies: to detect expression of p70 chain of the IL-2 receptor on human lymphoid cells (Zola, Purling, Koh and Tsudo) 217
Monoclonal antibody to colorectal carcinoma: production and characterization of (Teh, Thompson and McKenzie) 253
Murine *Listeria monocytogenes* infection: distinction between 'inflammatory' and 'immune' macrophages in (Tran, Cook, Ganas and Cheers) 289
Murine candidiasis susceptibility: associated with induction of T cell-mediated, strain-specific autoreactivity (Ashman) 179
Murine candidiasis: cell mediated immune responses correlate directly with susceptibility and resistance to infection (Ashman) 15
Murine candidiasis: cell-mediated immune responses correlate directly with susceptibility and resistance to infection (Ashman) 15
Murine cytomegalovirus infection: depression of humoral responses by (Price) 33
Murine MoAb administration: nature of HAMA response (Tjandra, Ramadi and McKenzie) 367
Murine ovaries, vaccinia virus-mediated damage of: and protection by virus-expressed IL-2 (Karupiah, Coupar, Ramshaw, Boyle, Blanden and Andrew) 325
Murine resistance to *Schistosoma japonicum* and *Schistosoma mansoni* induced by exposure to crude schistosome antigens plus cloned glutathione-S-transferases (Mitchell, Davern, Wood, Wright, Argyropoulos, McLeod, Tiu and Garcia) 377
*Mycobacterium bovis* protein, MPB70: mapping of the T and B cell epitopes of (Billman-Jacobe, Radford, Rothel and Wood) 359
Myoblast transfer therapy: elevated MHC class I and II antigens following stimulation with gamma-interferon (Bao, King, dos Remedios) 235

— N —

Natural cytotoxic cells: production of a monoclonal allo-antibody to (Smart, Stevenson, Farrely, Brien and Burton) 277
Neutrophil-activating peptide-1/interleukin-8 induced plasma leakage: effect of exogenous prostaglandin $E_2$ and actinomycin D (Colditz) 397

— O —

Oxidants and proteases: role in polymorphonuclear-induced epithelial cell detachment

and damage (Mendis, Venaille and Robinson) 95

— P —

p70 chain of the IL-2 receptor on human lymphoid cells: analysis using MoAbs and immunoflorescence (Zola, Purling, Koh and Tsudo) 217

Parasites, *Acanthocheilonema viteae*: immune response to infection in multimammate rats (*Mastomys natalensis*) (Chandrashekar, Rao and Subrahmanyam) 21

Parasites, *Plasmodium berghei*: quantitative estimation of T cells during infection (Wangoo, Kaur, Ganguly, Bhatti and Mahajan) 187

Parasites: review of immunoparasitology over 25 years (Mitchell) 349

Parasites, *Salmonella*: antigen presentation by peritoneal cells of normal and infected mice (Vordermeier, Pope and Kotlarski) 161

*Pasteurella multocida* infections in mice with reference to haemorrhagic septicaemia in cattle and buffalo (Ramdani, Dawkins, Johnson, Spencer and Adler) 57

Peritoneal cells infected with *Salmonella*: presentation of *Salmonella* antigens by (Vordermeier, Pope and Kotlarski) 161

Phosphatidylinositol-phospholipase C: potential uses of antibody against (Théveniau, Malapert and Rougon) 87

Plasma leakage induced by neutrophil-activating peptide-1/interleukin-8: effect of exogenous prostaglandin $E_2$ (Colditz) 397

*Plasmodium berghei* infection: quantitative estimation of T cells during (Wangoo, Kaur, Ganguly, Bhatti and Mahajan) 187

Polymorphonuclear-induced epithelial cell detachment and damage: effects of proteases and oxidants (Mendis, Venaille and Robinson) 95

Prostaglandin $E_2$ and actinomycin D: effect on plasma leakage induced by neutrophil-activating peptide-1/interleukin-8 (Colditz) 397

Proteases and oxidants: role in polymorphonuclear-induced epithelial cell detachment and damage (Mendis, Venaille and Robinson) 95

— R —

Rabbit keratinocytes, disaggregated: *in vitro* culture of (Briedahl, Judson, Dumble and Clunie) 119

Rat mammary adenocarcinoma-producing cachexia: biochemical manifestations of (Coyle, Rofe, Bourgeois and Conyers) 147

Rat small intestine enterocytes: dual mechanisms of inhibition of the immune response by (Pang, Clancy and Saunders) 387

Recombinant granulocyte-colony stimulating factor in athymic nude mice: *in vivo* effects (Pojda, Aoki and Tsuboi) 231

Rejection responses to cultured rabbit keratinocytes *in vitro* (Briedahl, Judson, Dumble and Clunie) 119

Respiratory secretions: inhibition of adhesion of *Haemophilus influenzae* to buccal cells by (Taylor, Cripps and Clancy) 335

— S —

*Salmonella* antigen presentation by peritoneal cells of normal and *Salmonella*-infected mice (Vordermeier, Pope and Kotlarski) 161

*Salmonella enteritidis* 11RX immunized mice: identification of antigens which stimulate T cells of (Vordermeier and Kotlarski) 299

*Salmonella enteritidis* 11RX-primed T cells: partial purification and characterization of low molecular weight antigens of (Vordermeier and Kotlarski) 307

*Schistosoma japonicum* and *Schistosoma mansoni* resistance by exposure to crude schistosome antigens plus cloned glutathione-S-transferases (Mitchell, Davern, Wood, Wright, Argyropoulos, McLeod, Tiu and Garcia) 377

Serum factor for macrophage activation after *in vitro* dodecylglycerol treatment of mouse lymphocytes (Homma, Millman and Yamamoto) 137

Sheep lymphocyte subpopulations in lymphosarcoma (Dimmock, Ward and Trueman) 45

Systemic lupus erythematosus arthritis: role of antibodies to type II collagen in pathogenesis of (Choi, Gatenby, Bateman and Cole) 27

— T —

T cell activation in coeliac disease (Penttila, Gibson, Forrest, Cummins and LaBrooy) 155
T cell and B cell epitopes of the *Mycobacterium bovis* protein, MPB70: mapping of (Billman-Jacobe, Radford, Rothel and Wood) 359
T cell and B cell mitogens: effect of glutamine on murine splenic leukocyte responses to (Brief Comm.) (Griffiths and Keast) 349
T cell-mediated, strain-specific autoreactivity: murine candidiasis susceptibility associated with (Ashman) 179
T cells of *Salmonella enteritidis* 11RX immunized mice: identification of antigens which stimulate (Vordermeier and Kotlarski) 299
T cells primed by *Salmonella enteritidis* 11RX: partial purification and characterization of low molecular weight antigens of (Vordermeier and Kotlarski) 307
T cells, human cytotoxic and proliferating: clonal analysis of effect of iron on (Rudd, Good, Chapman, Powell and Halliday) 317
T cells: *in vivo* effects of recombinant granulocyte-colony stimulating factor in athymic nude mice (Pojda, Aoki and Tsuboi) 231
T cells: antigenic requirements for stimulation and target cell recognition by immune and non-immune cytotoxic (Owen, Grahl, Zador, Dorer, Klein and Rubin) 269
T cells: quantitative estimation of during acute and chronic *Plasmodium berghei* infection (Wangoo, Kaur, Ganguly, Bhatti and Mahajan) 187
Transplantation: *in vitro* culture of disaggregated rabbit keratinocytes (Briedahl, Judson, Dumble and Clunie) 119
Tumour necrosis factor: improved sensitivity of ELISA for (McLaughlin, Elwood, Ramadi, Pica and McKenzie) 51
Tumour, colorectal: production and characterization of a new MoAb to (Teh, Thompson and McKenzie) 253
Tumour–host competition and mechanisms of cachexia: *in vitro* and *in vivo* studies of a rat mammary adenocarcinoma, biochemical manifestations of (Coyle, Rofe, Bourgeois and Conyers) 147
Tumour: anti-colorectal carcinoma MoAbs reactive with human milk fat globular membranes (Teh, Xing and McKenzie) 207
Tumours: production of MoAbs to carcinoembryonic antigens (Teh and McKenzie) 263

— V —

Vaccine, recombinant vaccinia virus: response of monkeys to vaccination with (Ruby, Brinkman, Jones and Ramshaw) 113
Vaccines, hepatitis B: humoral immune responses in mice using gamma inulin preparations as adjuvants for (Leslie, Nicholson, Dimitrakakis, Johnston and Gust) 107
Vaccinia virus-mediated damage of murine ovaries and protection by virus-expressed IL-2 (Karupiah, Coupar, Ramshaw, Boyle, Blanden and Andrew) 325
Vaccinia virus-mediated infection of murine ovaries: asialo-$GM_1$ as an additional virus receptor? (Brief Comm.) (Karupiah and Blanden) 343
Vaccinia virus, recombinant: response of monkeys to vaccination with (Ruby, Brinkman, Jones and Ramshaw) 113
Virus vaccines, hepatitis B: humoral immune responses in mice using gamma inulin preparations as adjuvants for (Leslie, Nicholson, Dimitrakakis, Johnston and Gust) 107
